

# QUOTE MODULE

RFQ and book shipments in one tool

EASILY COMPARE DIFFERENT SHIPMENT RATES AND BOOK YOUR SHIPMENT STRAIGHT AWAY, ALL IN ONE GO!

Requesting quotes from carriers can be troublesome. Especially when you need to contact each carrier independently about their pricing for extraordinary shipments and you wish to invite them for a Request for Quotation (RFQ). In that case you will probably call and or email multiple carriers, which is a very time-consuming process.

ShipitSmarter offers the Quote Module, a solution which saves you time and gives you the possibility to easily compare different shipment rates and book your shipment straight away, all in one go.

## Benefits

- ★ Improve and standardize carrier collaboration.
- ★ Ability to compare shipment rates for extraordinary shipments.
- ★ Easily try new carriers by inviting them to bid on shipments.

## Always ship at the best price

As the Quote Module is integrated in ShipitSmarter, each RFQ can be created from any shipment (like a normal booking), but instead of retrieving the rates as you are used to, you simply press the button to "get quotes".

To organize a quote event, you only need to enter certain details about your event, such as start - and end time, carrier notes, etc. and you select the carriers you want to invite for the event. These carriers will then receive an email. They can either refuse or participate by bidding in your ShipitSmarter environment while using their own credentials. Once your RFQ is closed, you select the winning bid and finish your shipment in the same screen, by just clicking on 'mark shipment as booked'. It is that simple. Depending on your setup, it is also possible to immediately book the shipment and print the label once the carrier is selected (and the carrier is setup as an EDI or email carrier).

ShipitSmarter shows for each branch office which carriers are strong in certain areas and what price has been agreed on a global level. As a result better transport decisions are made leading to significant cost reductions. 'This enables us to properly calculate quotations and purchase correctly.'
